

Neutral Cellulase NE-1S

Introduction

Neutral Cellulase NE-1S is produced by microbial submerged fermentation. These can be used for biopolishing treatment of cotton, linen, cotton blended fabric in order to get a smooth surface and line sharpness.

Physical and Chemical Specification

Appearance: light yellow or yellow brown liquid

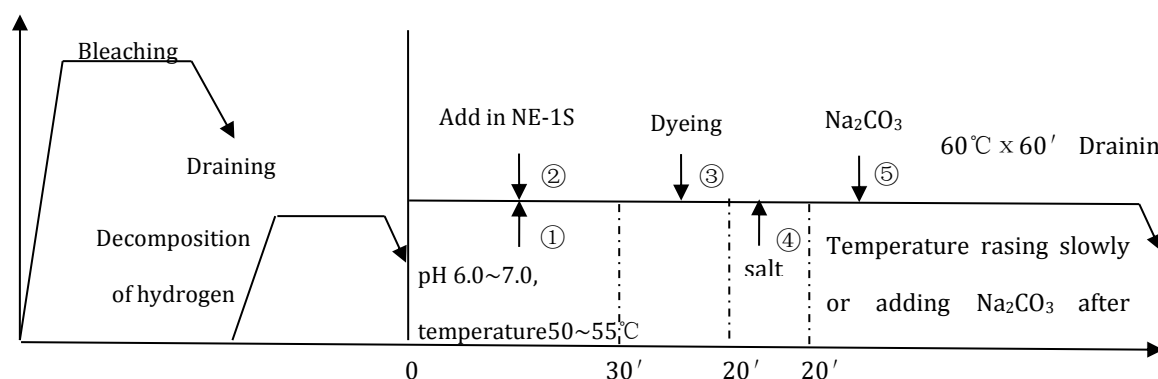

pH value: 5.0~5.1

Advantages

Low weight and strength loss

Better color retention and can be used in dye bath

Process

Note: NE-1S will be used in dosage of 0.1~0.3% (o.w.f.) and be diluted.

Packing

25Kg, 200Kg/ plastic drum.

Storage and Safety

Store at 10~25°C under dry, shaded and cool condition and avoid high temperature and direct sunlight. Please close the container after getting the material to avoid contamination. If the enzyme gets in touch with your skin or eye, immediately flush with water for at least 15 minutes. Shelf life: 6 months.
